Comfort Control at Your Fingertips

Things to Consider Before You Buy

Comfort

Carrier specializes in creating a customized home comfort system tailored to your needs with our broad selection of residential heating and cooling products. And, Carrier's Performance™ Series ComfortZone™ II can give you the ability to fine-tune your home comfort zones exactly to your needs. Your Carrier dealer can help you choose the best system for your home including Carrier-exclusive features that further enhance your indoor environment.

- The baby's room needs to be warm and cozy, the basement needs to be cool and dry, and the kitchen can be adjusted at any time. Zoning offers enhanced temperature control where you need it most.
- ComfortZone™ II allows you to program up to eight different zones within your home, all at the touch of a button.
- With IdealHumidity™, monitor and adjust your home's humidity level even when your home comfort system isn't actively heating or cooling. Keeping the proper balance of moisture in your home allows you to remain more comfortable at higher temperatures in the summer and lower temperatures in the winter. And, more efficiency means lower utility costs.
- Smart Recovery™ makes sure each zone reaches its set temperature by starting your system ahead of schedule to ensure comfort right on time.
- Zoning keeps the most commonly used areas of a home comfortable by delivering conditioned air where you need it most. Zoning can also offer increased energy saving benefits up to 20% by delivering comfort to the areas of the home where and when you need it.

IdealHumidity

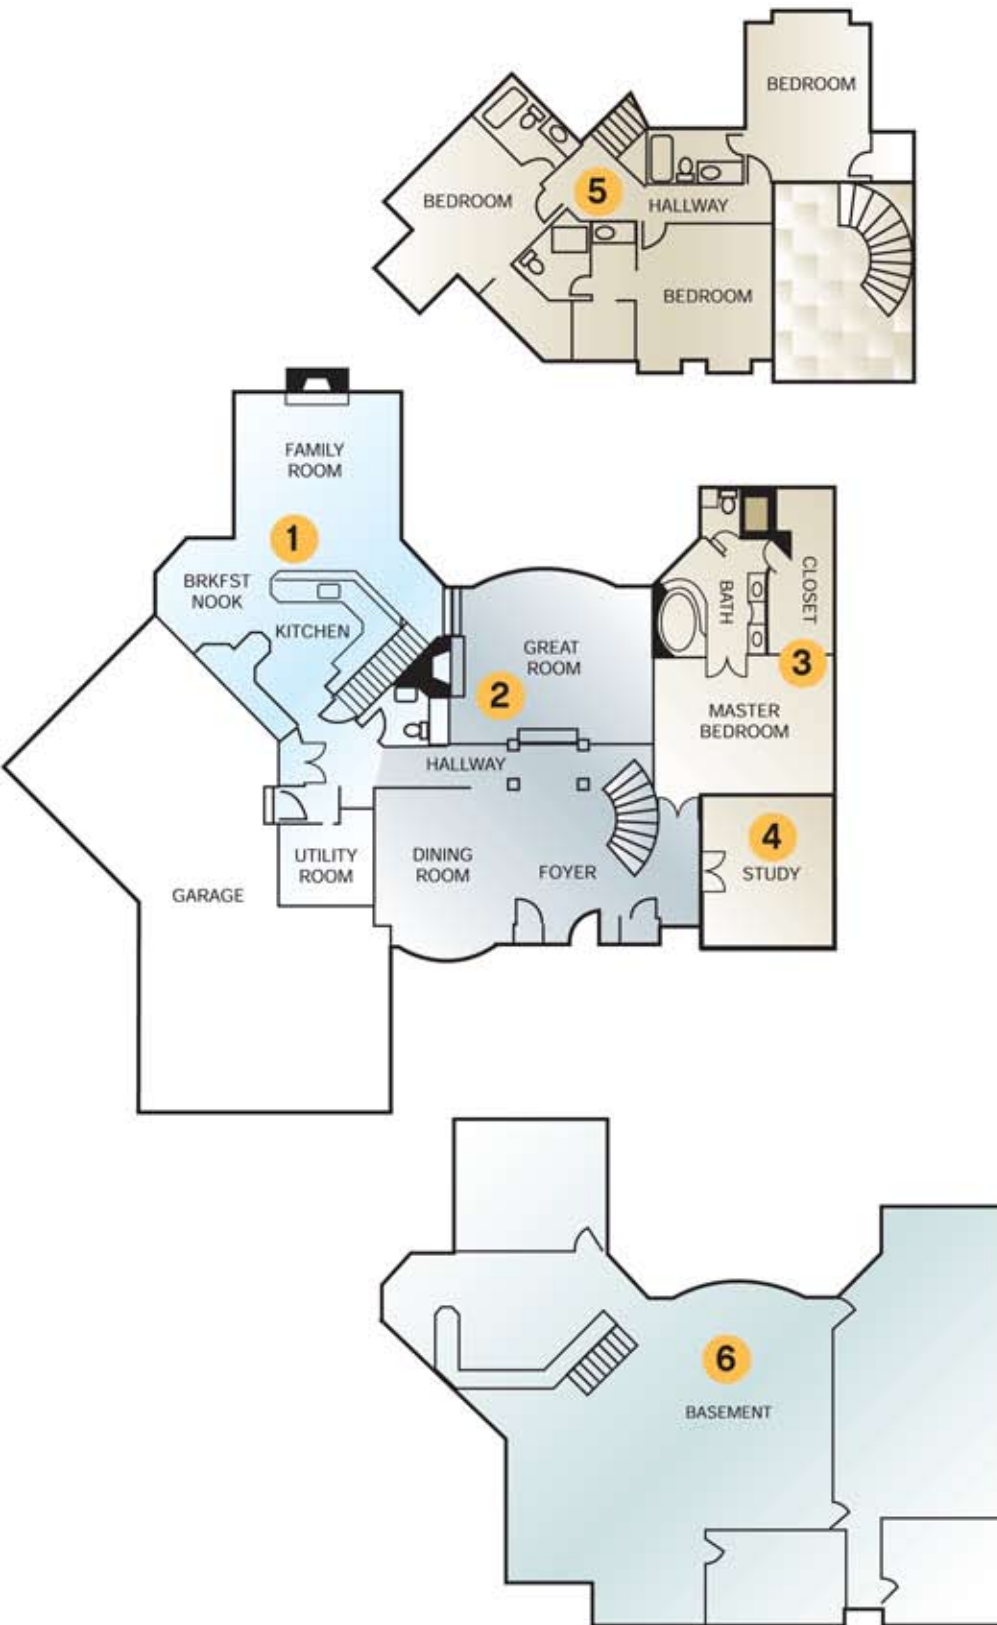

Customize

Customize your indoor comfort with flexible temperature programming in different parts of the house. Your Carrier dealer will work with you to help you decide how to best zone your home for optimum comfort and efficiency. Zoning considerations are based on household use, where the rooms are located along with their relation to each other as well as how much sunlight the rooms typically receive during the day. As an example, use the floor plan pictured to the right.

Technology

- 1 Zone 1:** The kitchen, breakfast nook, family room and utility room are combined into one zone due to similar solar load requirements.
- 2 Zone 2:** The large great room, dining room and foyer are grouped together due to the zone proximity and supply airflow.
- 3 Zone 3:** The master bedroom, master bath and walk-in closet can be programmed as one unit for ideal comfort even at night.
- 4 Zone 4:** Extra bedroom on the main floor isn't used often is ideal for an extra zone. This zone can be set back further and save energy when the room is not in use.
- 5 Zone 5:** Controlling the upstairs as a single zone allows greater comfort for the entire upstairs area.
- 6 Zone 6:** The basement becomes its own zone for more control in all seasons.

Warranty

Carrier's Performance Series ComfortZone™ II Zoning System is protected by a five-year limited warranty. Extended warranties are also available. Ask your Carrier dealer for details.

Turn to the Experts

Willis Carrier invented air conditioning in 1902. Over 100 years later, we're proud to say Carrier systems are trusted in more homes than any other brand.

Carrier continues to be on the forefront of innovative engineering and unsurpassed standards of excellence. So when choosing a home comfort system, you'll want to turn to the experts. Your Carrier dealer will evaluate your home, such as window placement and size, ductwork, other structural specifics and lifestyle to provide a customized indoor comfort plan designed specifically for you. And when you have an expert helping you make an educated decision, you're going to feel more comfortable.
